GrumbleBook

Feature Demo (Video)

WHY GRUMBLEBOOK?

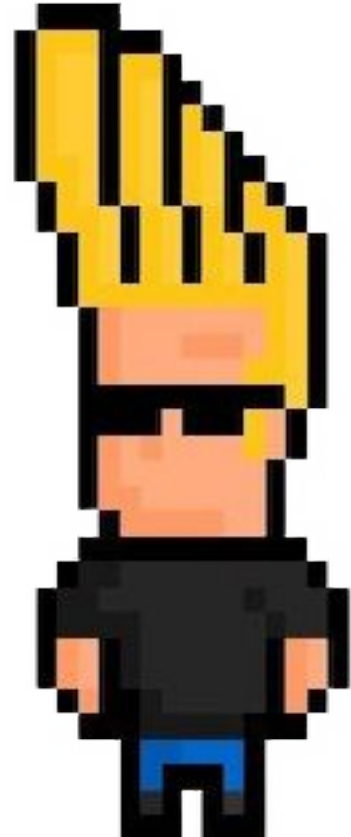

Agreeing a strong theme at the start made research & rollout more straightforward & fun.

Grumbles: a fun outlet for our frustrations.

It's what Twitter or Facebook would be called if launching in 2022.

Retro Theme: dot com bubble, heyday of internet nostalgia.

Kyle from WebDev Simplified showed us the way on React. So we are honouring him as our reincarnation of Tom from MySpace

Working as a team

Team charter

- spending time on this paid off
- mottos we stuck to -->

Collaborative approach to learning

- allowing for varied preferences
- lots of videos about React
- explicit learning before we did any coding
- mini team workshops

Opportunities for the final project

- be mindful of simultaneous merges!
- stick to the formatting rules.
- don't get too siloed
- it's OK to hand over a feature if you want to work on something else.

“A rising tide lifts all ships”

“Share the despair”

“If you want to go fast go alone. If you want to go far, go together”

“Not all that wander (on stack overflow) are lost”
